

To: Community Representatives

From: Janyce Hedetniemi, Director
Office of Community Liaison
National Institutes of Health (NIH)

Date: January 2002

NOTES FROM THE DIRECTOR, OFFICE OF COMMUNITY LIAISON

Happy New Year and all best wishes for a peaceful, prosperous, and healthy year for all of our community and nation.

Looking ahead to what we will be doing with the Community Liaison Council, I anticipate that the next few months will see us once again deliberating on the 2001 Update of the Bethesda Campus NIH Master Plan. You'll recall that we have temporarily suspended discussion on the update to allow NIH time to consider how to integrate security provisions into the plan. Accompanying the update will be the requisite review of the draft Environmental Impact Statement and the public comment period and hearings that are part of the Master Plan process.

As we look to the new year, it is my hope that we will be able to offer again the opportunity for community involvement and participation in more campus events. And, we in the Office of Community Liaison are hopeful that we will be able to sponsor "Share the Health," our Community Health Forum, at the Natcher Conference Center in October 2002!

All best wishes to each of you and a note of personal thanks to all of you who have been so supportive of me, of my office, of NIH, and of our efforts to be a responsible and responsive part of this wonderful community.

NIH CAMPUS NEWS AND ACTIVITIES

NIH Appoints Acting Director for NIDA

On November 30, 2001, NIH Acting Director Ruth Kirschstein named Glen R. Hanson, D.D.S., Ph.D., as acting director of the National Institute on Drug Abuse (NIDA). Dr. Hanson's appointment follows the resignation of Alan Leshner, Ph.D., who had

served as NIDA's director since 1994. Dr. Leshner left NIDA to become chief executive officer of the American Association for the Advancement of Science.

Dr. Hanson, best known for his work on Ecstasy and

Glen R. Hanson

(continued on page 2)

The Community Liaison Council (CLC) will hold its next meeting on **Thursday, January 17, at 4 p.m.**, in Building 45, Room C on the NIH campus.

(continued from page 1)

amphetamines, previously served as the director of NIDA's Division of Neuroscience and Behavioral Research. He has received the NIDA Senior Scientist Award and served on numerous NIH grant review committees. He currently sits on the editorial board of the *Journal of Pharmacology and Experimental Therapeutics*. Dr. Hanson received his D.D.S. from the University of California, Los Angeles, and a Ph.D. from the University of Utah.

Women's Fair Rescheduled for March 16

The 2002 Montgomery County Women's Fair, previously scheduled for March 30 at NIH, will now take place on Saturday, March 16, from 8:30 a.m. to 5 p.m. at Montgomery Blair High School in Silver Spring. Sponsored in part by NIH, the fair serves as a leading forum on women's issues. This year's fair features workshops, a keynote speaker, exhibits, and networking opportunities. The 2002 Montgomery County Women's Fair Committee accepts applications until January 31 for exhibitors and February 8 for advertisers. For more information about exhibits, call Rachel Howard at 301-460-0913. For more information about advertising, call Ronnie Mellinger at 301-933-3121, and for Spanish translation, call Magda Sideregts-Vetter at 301-530-3259. Information can also be found on the fair's Web site at <http://www.mcwomensfair.org>.

First Woman Added to "Profiles in Science"

Nobel laureate Barbara McClintock, Ph.D., who made a name for herself in genetic research, is the first woman to be featured on the National Library of Medicine's (NLM) "Profiles in Science" Web site, <http://www.profiles.nlm.nih.gov>. The site, which chronicles the lives and works of 20th-century biomedical scientists, features detailed information and often unpublished scientific works by each scientist. The online exhibit includes laboratory notes, correspondence, unpublished manuscripts, and lecture notes, as well as photographs of Dr. McClintock. "Profiles in Science," launched in 1998, is a continuing project. NLM announces each new collection as it is added.

2002 Human Genome Lecture Series Set

The National Human Genome Research Institute announced its lecture series schedule for 2002. The 2001–2002 Human Genome Lecture Series provides NIH and the local biomedical community with the latest progress being made on the Human Genome Project. Top scientists and physicians share their knowledge on this exciting subject between 11:30 a.m. and 1 p.m. on select Thursdays throughout the year. All lectures take place in the Lipsett Amphitheatre in Building 10 on the NIH campus. For more information, call Joy Boyer at 301-402-4997.

Unipole Erected on NIH Campus

Two years ago, when a fire erupted in the Metro system, inadequate communication from within the tunnels hampered the ability of emergency officials to respond. Since then, Montgomery County has collaborated with Metro to improve communication within the tunnels and from the tunnels to county police, fire, and rescue squads. The County received permission to place a 30-foot, 800 MHz unipole antenna on NIH property, adjacent to the Medical Center Metro Station. Officials erected this unipole last month, along with unipoles at the Glenmont and White Flint Metro stations.

NIMH Director Named Harvard Provost

Steven E. Hyman, M.D., director of the National Institute of Mental Health (NIMH) for the past five years, resigned his directorship this past fall to serve as provost at Harvard University, where he once was a professor. In his new role, Dr. Hyman will help shape academics and policy at the university.

Dr. Hyman initiated major changes in NIMH's research portfolio and accomplished much in the five years he presided over NIMH. He collaborated with the White House and the Office of the Surgeon General on several mental health reports and conferences and raised public awareness and understanding of mental illness through coordinated outreach efforts. With Dr. Hyman's direction, NIMH played a leadership role in translating basic research into clinical study that is relevant to real patients in real world settings. He is proud of this accomplishment and of the role that the Institute has taken in protecting individuals who volunteer for clinical research.

Former NIH Director Harold Varmus, M.D., who won a Nobel prize and currently serves as president and chief executive officer of Memorial Sloan-Kettering Cancer Center, said Dr. Hyman brought modern science to the study and treatment of mental illness, and that he fostered cooperative research among other neurologically-oriented NIH institutes.

Before joining NIMH, Dr. Hyman taught and directed several programs at Harvard, including the Interfaculty Initiative on Mind/Brain/Behavior. He also served as director of research for the Department of Psychiatry at Massachusetts General Hospital.

"As excited as I am to be returning to Harvard, I feel a deep sense of loss in leaving NIMH," Dr. Hyman said. "My sadness in leaving is tempered by the recognition that NIMH has an incredibly strong cohort of leaders and staff who share high standards, a deep knowledge of science, and a firm commitment to our public health mission. We have accomplished more together than many could have imagined."

NIH "Mad as a Hatter?" Mercury Reduction Campaign Goes to Baltimore—and Beyond

In honor of America Recycles Day, NIH joined the Maryland Department of the Environment (MDE) and other organizations committed to pollution prevention for a day-long celebration at the Port Discovery Children's Museum in Baltimore, Maryland. At this fun and informative event, NIH's Environmental Protection Branch discussed and distributed information about reducing mercury in schools, homes, and the environment with students and teachers from more than 50 elementary schools.

The "Mad as a Hatter?" campaign aims to improve awareness of mercury hazards and to reduce mercury use at all NIH facilities throughout the country. The campaign covers the identification and replacement of mercury-containing medical devices, such as thermometers and blood pressure cuffs, as well as the reduction of mercury in electrical equipment, such as thermostats, fluorescent light bulbs, and batteries. Excessive exposure to mercury can lead to neurological disorders and death. Mercury is also highly persistent, bioaccumulative, and toxic in the environment, making it a high priority for pollution prevention.

Local children view displays about the importance of recycling.

NIH's popular mercury reduction campaign, which has gained considerable support and attention since its inception, is now being used by many other organizations. In 2002, the MDE will partner with NIH to introduce a new mercury reduction program for the Maryland school system. With this added attention comes the need for support. NIH is looking for volunteers to assist in developing school programs or to speak about mercury reduction in schools. To help, call Captain Edward Rau at 301-496-7990.

Beethoven Quartet Relocated

Last year, the Foundation for Advanced Education in the Sciences (FAES) Graduate School offered a lecture-performance course on Beethoven's string quartets. Because of NIH security measures, this year's course must move off campus. The Washington Conservatory of Music (WCM) will offer this course at Briggs Baptist Church, located at 5144 Massachusetts Avenue in Bethesda. The course, which features live performances of 16 quartets, is intended for people who cannot read music as well as for experienced musicians. For more information, call 301-946-2311. To register, contact WCM at 301-320-2770. The course begins February 4.

New Director Named for NCI

Andrew C. von Eschenbach, M.D., is the new director of the National Cancer Institute (NCI). Dr. von Eschenbach, the twelfth NCI director since its inception in 1938, succeeds Richard Klausner, M.D. Dr. Klausner left NCI last fall to head the newly founded Case Institute of Health, Science, and Technology.

Dr. von Eschenbach

Dr. von Eschenbach comes to NCI from the University of Texas M.D. Anderson Cancer Center in Houston, where he worked for 25 years. He served as director of the Genitourinary Cancer Center and of the Prostate Cancer Research Program. He also served as vice president of academic affairs, executive vice president, and chief academic officer. Dr. von Eschenbach has published more than 200 articles, books, and chapters, and he sits on the editorial board of four journals. He is on the board of the National Coalition for Cancer Research, and he was president-elect of the American Cancer Society before his appointment to NCI.

Dr. von Eschenbach received his medical degree from Georgetown University and completed residencies in general surgery and urology at Pennsylvania Hospital in Philadelphia. He then went on to teach urology at the University of Pennsylvania School of Medicine.

FAES Spring Courses To Begin January 28

The FAES Graduate School is still accepting registrations for the spring 2002 semester, which begins on January 28. Walk-in registration takes place January 9–15. Classes take place in the evening on the NIH campus. Schedules are available in the graduate school office in Building 60, Suite 230; in the foundation bookstore in Building 10, Room B1L101; and in the business office in Building 10, Room B1C18. For more information or a schedule, call 301-496-7976 or visit the FAES Web site at <http://www.faes.org>.

NIH Participates in World AIDS Day

In recognition of World AIDS Day on December 1, NIH launched a new Web resource at <http://worldaidsday.nih.gov>. The Web site provides comprehensive information about NIH-supported HIV/AIDS research at NIH and worldwide. Researchers, health care workers, and the public can access a variety of AIDS-related information, including NIH's AIDS research agenda and budget figures, scientific and medical literature, online order forms for free publications, counseling information, seminar information, and much more. The site also features a statement from Anthony S. Fauci, M.D., director of the National Institute of Allergy and Infectious Diseases.

In addition to launching the Web site, NIH displayed panels from the NAMES Project AIDS Memorial Quilt in the atrium of the Warren Grant Magnuson Clinical Center. Researchers from the Dale and Betty Bumpers Vaccine Research Center also participated in local, community-based World AIDS Day activities. The World Health Organization first recognized World AIDS Day in 1988 to increase awareness of the HIV/AIDS pandemic. The year 2001 marked 20 years since the first reports of the disease.

OCL Web Site To Be Redesigned

In 2002, the NIH Office of Community Liaison will redesign its Web site, and we want to know your ideas! Please let us know what you find useful about our current Web site, <http://ocl.od.nih.gov>, or what you'd like to see on our future site by contacting Jennie Kirby at 301-496-3931 or via e-mail at kirbyj@od.nih.gov.

NIH CALENDAR OF EVENTS*

January 7

2001–2002 NIH Neuroscience Seminar Series: *Novel GABAergic and Glycinergic Mechanisms in Auditory Brainstem Nuclei* by Laurence Trussell, Ph.D., Oregon Health Science University, noon, Lipsett Amphitheatre, Building 10, NIH campus, free and open to the public. Continuing medical education (CME) credit available. For more information, contact Dr. Story Landis at 301-435-2232 or by e-mail at landiss@ninds.nih.gov.

January 8

WFLC Faces and Phases of Life Seminar Series: *Finding a Job That Is a Good Fit for You*, noon–2 p.m., Room 6C6, Building 31, NIH campus, free and open to the public. Registration is required. For more information or to register, call 301-435-1619.

Federally Employed Women Bethesda Chapter Monthly Meeting: *Beyond Mediocrity: Secrets of Empowerment* by Blanche Williams, noon–1 p.m., Balcony C, Building 45, NIH campus, free and open to the public. Sign language interpreters available. For more information or for reasonable accommodation, call Claire McCullough at 301-435-8601.

2001–2002 NIH Director's Wednesday Afternoon Lecture Series: ***Special Tuesday Lecture: Immunobiology of Prion Diseases* by Abriano Aguzzi, M.D., University of Zurich Medical School, Switzerland, 2–3 p.m., Masur Auditorium, Building 10, NIH campus, free and open to the public. CME credit available. For more information, call Hilda Madine at 301-594-5595.

*** Please note the time change. This is a special Tuesday lecture taking place at 2 p.m.*

January 13

FAES Music Series: *Randall Scarlata, baritone, and Cameron Stowe, piano*, 4 p.m., Masur Auditorium, Building 10, NIH campus, \$25. Tickets may be purchased in advance or in Building 10, Room B1L101, on the day of the concert from 2:45 to 3:45 p.m. For more information, call 301-496-7975 or visit <http://www.faes.org/>.

January 14

2001–2002 NIH Neuroscience Seminar Series: *Homeostatic Regulation of Synaptic Structure and Function* by Graeme Davis, Ph.D., University of California, San Francisco, noon, Lipsett Amphitheatre, Building 10, NIH campus, free and open to the public. CME credit available. For more information, contact Dr. Story Landis at 301-435-2232 or by e-mail at landiss@ninds.nih.gov.

January 15

WFLC Faces and Phases of Life Seminar Series: *Unclutter Your Office, Your Home, and Your Mind: A Guide to Personal Organization, Part I*, noon–1:30 p.m., Room 6C6, Building 31, NIH campus, free and open to the public. Registration is required. For more information or to register, call 301-435-1619.

January 16

2001–2002 NIH Director's Wednesday Afternoon Lecture Series: *Brain Waves and Immune Genes in Brain Wiring During Development* by Dr. Carla Shatz, Harvard University, 3–4 p.m., Masur Auditorium, Building 10, NIH campus, free and open to the public. CME credit available. For more information, call Hilda Madine at 301-594-5595 or visit <http://www1.od.nih.gov/wals/schedule.htm>.

National Library of Medicine History of Medicine Seminars: *Epidemiologists, Equines, and Enterocolitis: Public Health and the Infant Mortality Problem in Belle Epoque, Uruguay* by Anne-Emanuelle Birn, Ph.D., 2–3:15 p.m., Conference Room B, Building 38, NIH campus, free and open to the public. For more information, call 301-402-8878 or visit <http://www.nlm.nih.gov/hmd/seminars.html>.

Mobile Mammography Screening by the George Washington University Breast Care Center, 9:30 a.m.–3:45 p.m. by appointment, Lot 31D, Building 31, NIH campus, \$138. For more information or to make an appointment, call 202-994-9999.

January 18

2001–2002 NIH Director's Seminar Series: *HPV and Cervical Cancer: The Road from Etiological Understanding to Preventive Strategies* by Allan Hildesheim, Ph.D., Environmental Epidemiology Branch, NIH, noon, Wilson Hall, Building 1, NIH campus, free and open to the public. For more information, call 301-496-1921.

2001–2002 NIH Director's Wednesday Afternoon Lecture Series: *Special Friday Lecture: Crystallization, Structures and Mechanisms of the Membrane Protein Complexes from the Respiratory Chain*, by Hartmut Michel, Ph.D., Max-Planck-Institute of Biophysics, Frankfurt am Main, Germany, 3–4 p.m., Masur Auditorium, Building 10, NIH campus, free and open to the public. For more information, call Hilda Madine at 301-594-5595.

January 22

WFLC Faces and Phases of Life Seminar Series: *Unclutter Your Office, Your Home, and Your Mind: A Guide to Personal Organization, Part II*, noon–1:30 p.m., Room 6C6, Building 31, NIH campus, free and open to the public. Registration is required. For more information or to register, call 301-435-1619.

January 23

2001–2002 NIH Director’s Wednesday Afternoon Lecture Series: *Race and Ethnic Disparities in Physical and Mental Health: The National Survey of American Life* by James S. Jackson, Ph.D., University of Michigan, 3–4 p.m., Masur Auditorium, Building 10, NIH campus, free and open to the public. CME credit available. For more information, call Hilda Madine at 301-594-5595 or visit <http://www1.od.nih.gov/wals/schedule.htm>.

January 27

FAES Music Series: *Takacs Quartet*, 4 p.m., Masur Auditorium, Building 10, NIH campus, \$25. Tickets may be purchased in advance or in Building 10, Room B1L101, on the day of the concert from 2:45 to 3:45 p.m. For more information, call 301-496-7975.

January 28

2001–2002 NIH Neuroscience Seminar Series: *Genetic Analysis of Mammalian Synapse Formation* by Joshua Sanes, Ph.D., Washington University Medical School, noon, Lipsett Amphitheatre, Building 10, NIH campus, free and open to the public. CME credit available. For more information, contact Dr. Story Landis at 301-435-2232 or by e-mail at landiss@ninds.nih.gov.

January 30

2001–2002 NIH Director’s Wednesday Afternoon Lecture Series: *Imaging the Dynamics of Living Systems from Single Cells to Whole Animals* by David W. Piston, Ph.D., Vanderbilt University, 3–4 p.m., Masur Auditorium, Building 10, NIH campus, free and open to the public. CME credit available. For more information, call Hilda Madine at 301-594-5595 or visit <http://www1.od.nih.gov/wals/schedule.htm>.

January 31

2001–2002 NHGRI Human Genome Lecture Series: *Anticipating Genetic Enhancement: Professional, Ethical, and Public Policy Issues* by Eric Juengst, Ph.D., 11:30 a.m.–1 p.m., Lipsett Amphitheatre, Building 10, NIH campus, free and open to the public. CME credit available. For more information, call Joy Boyer at 301-402-4997.

**Call to confirm your event.*

OTHER NEWS AND ACTIVITIES OF INTEREST

Christmas Tree Recycling

The Montgomery County Department of Public Works and Transportation is collecting and recycling Christmas trees now through January 31. Remove all metal from the tree and place it on the curb

along with blue-bin recyclables by 7 a.m. on regularly scheduled recycling days. The County will not collect any trees with root balls. Officials suggest planting these trees instead.

Art Exhibitions at Strathmore

The Strathmore Hall Arts Center’s 10th annual juried member artist exhibition begins on January 11. This year’s exhibition theme, “Remembrance,” recognizes the terrorist attacks on the Pentagon and on the World Trade Center. More than 500 artists will participate in the show juried by Washington-area painter John Bryans. At 1 p.m. on January 12, visitors can participate in a free gallery walk-through with art critic and independent curator David Tannous. While you’re at Strathmore for the juried exhibition, be sure to stop by the Invitational Gallery to see “Art You My Valentine?”, a collection of works by artist members featuring themes of love, beauty, and friendship. Strathmore is located at 10701 Rockville Pike in North Bethesda. Call 301-530-0540 for more information.

Family Fun with the Bethesda Libraries

The Bethesda-Chevy Chase Services Center offers “Bethesda on the Move—Storytimes for Families” on January 10 at 10:30 a.m. Visitors can enjoy stories, songs, stretches, and fingerplays with staff from the Bethesda Library. The Bethesda-Chevy Chase Services Center is located at 4805 Edgemoor Lane. Metered parking is available in the garage below the center.

The holidays may have passed, but there are still opportunities for celebration at the Chinese New Year Festival at the Davis Library on January 19. Bring the family for a program of music, arts and crafts, and dance. For more information, call the library at 301-897-2200 or visit <http://www.mont.lib.md.us>. The Davis Library is located at 6400 Democracy Boulevard in Bethesda.

A Different Kind of Theater Experience

BAPA’s Imagination Stage continues its 10th season with the premiere of *The Party in the Sky & Other Tales from Brazil*, presented by Imagination Stage’s Deaf Access Company. This production, which combines sign language with the spoken word, encourages families to see and hear theater in a new way.

Performances take place on Saturdays and Sundays, January 26–February 10, at 12:30 and 3 p.m. Tickets are \$6.50 for general admission and \$5.50 for groups of 10 or more. BAPA's Imagination Stage is located at White Flint Mall, 11301 Rockville Pike, in North Bethesda, on the second level next to Bloomingdale's. For more information, call the Imagination Stage box office at 301-881-5106.

Montgomery County Offers Online Reporting of Broken Streetlights

Montgomery County's online services have a new feature. Residents can now use the Web to report broken streetlights. In an effort to increase pedestrian safety, the Web site, <http://www.dpwt.com/tcle>, combines the County's capabilities with Geographic Information System maps. Residents can access a map, zoom in on a streetlight location, and click on the light that is not working. That click sends the location of the broken light to a database that tracks the condition of County streetlights. The new online feature should shorten the time it takes to repair a light.

New County Citizen's Guide Available

The Community Outreach Program of the Montgomery County Department of Public Works and Transportation recently released an updated version of its *Citizen's Guide to Services*. This handy brochure, which lists more than 80 services provided by the department, gives residents a quick and easy way to find accurate telephone numbers and e-mail addresses for issues such as potholes, broken streetlights, and transit information. For a free copy, call 240-777-7155 or e-mail director.dpwt@co.mo.md.us.

Round House Theater Presents *The Weir*

Get a winter round of ghost stories with *The Weir* by Conor McPherson. Set on a dreary night in a dark pub, the play features men who each attempt to impress the lovely Valerie with a ghost story. However, Valerie has a story of her own to tell. *The Weir* runs January 30–February 24, and tickets range from \$23 to \$31, depending on the day and time of the performance. The Round House Theater is located at 12210 Bushey Drive in Silver Spring. For more information or to order tickets, call 301-933-1644.

Capital Crescent Trail Tunnel Art Dedicated

At last! Artist Sally Callmer's "Prismatic Passage," a colored-mesh art installation in the Capital Crescent Trail

© Photo of Sally Callmer's "Prismatic Passage" by Matthew Borkoski, 2001

Tunnel, was dedicated on October 13, 2001, after combating several rounds of vandalism. Callmer wanted runners, bikers, and pedestrians to see a spectrum of color that would blend together as they moved through the tunnel. The Montgomery County Arts and Humanities Council sponsored the art work, which should be on display for about a year. The tunnel is part of a seven-mile trail that runs from Georgetown to downtown Bethesda.

TRY THIS WEB SITE:

<http://www.alcoholfreechildren.org>

The National Institute on Alcohol Abuse and Alcoholism invites you to explore this new Web site designed to keep children aged 9–15 years from using alcohol. Visitors to the site can learn about activities in their home state as well as nationwide efforts by a coalition consisting of 30 governors' spouses, the Robert Wood Johnson Foundation, several federal agencies, and public and private organizations. The site features statistics, prevention resources, research findings, publications, and breaking news, along with experts who can answer site visitors' questions.

VOLUNTEER OPPORTUNITIES

Postpartum Depression Study

The National Institute of Mental Health (NIMH) seeks mothers, aged 18–40 years, who have experienced one or more past episodes of postpartum depression following a full-term pregnancy. Participants should not be currently depressed, and they must be free of medical illness, medication-free, and not breastfeeding. Volunteers may participate in a six-month protocol investigating the effects of hormones on brain and behavior. For more information, call Linda Simpson-St. Clair at 301-496-9576.

Post-Traumatic Stress Study

Medically healthy persons aged 18 years and over are needed for an outpatient study of post-traumatic stress disorder. Participation includes a thorough mental health assessment and research medication. For more information, call 1-866-MAP-NIMH.

Perimenopause Study

NIMH seeks healthy women, aged 40–50 years, for studies of perimenopause. Women must have regular menstrual cycles and be medication-free. The study will include periodic hormonal evaluations, symptom rating completion, and occasional interviews. Compensation will be provided. For more information, call Linda Simpson-St. Clair at 301-496-9576.

Healthy Children Needed

Healthy children, aged 5–8 years, are needed for a study by the National Institute of Neurological Disorders and Stroke that compares their language organization with that of children with epilepsy. Your children may be eligible if they speak English as their first language; do not have a learning disability, attention deficit disorder, or any serious medical condition; and do not wear braces or glasses (contacts are allowed). Participation involves two to four outpatient visits to the NIH Clinical Center over one year, and compensation is provided. For more information, call Lynn at 301-402-3745.

The OCL Update is available on our Web site at <http://ocl.od.nih.gov>. If you would rather view this document online and not receive a printed version, please contact the OCL office at 301-496-3931 or send us an e-mail at jh69z@nih.gov. If you would like to list an upcoming event of interest to the local community, call Terry LaMotte at Palladian Partners, OCL support contractor, at 301-650-8660, or e-mail at tlamotte@palladianpartners.com.
